To Our Valued Customers:

Subject: EEI Support thru COVID-19 Closures
Update 5/25/20

With the gradual re-opening of global facilities EEI Supply Chain is now focusing any adverse effects to our Customers' contract schedules. We will communicate, specifically increased lead times through our Customer Service and Program Team. Here are a few that have recently become evident.

PCB Suppliers: Reported increased lead times, influenced by staggered work schedules and availability of laminate materials, i.e. Pyralux AP, Nelco and Rogers. Lead times being quoted from 20 to 30 weeks.

Connectors: Glenair, Airborn & Amphenol are reporting from 24 to 28 weeks. Smith Interconnect are maintaining 16 – 20 weeks.

Resistors:

Wirewound: RER & RWR at 25 to 32 weeks;
Metal Film: M55342/D55342 at 25 weeks; RLR – 29 wks; RNR – 40 wks; RNC – 28 wks
Network: M83401 SIPs at 28 wks

Capacitors:

Ceramic & Film Capacitors: M39014, CMR, CCR & CDR Series reported between 18-24 wks.
Tantalum and Film/Lytic Capacitors: AVX LT have increased up to 40 weeks.

Mil-Spec Relays: M39016 Series up to 26 wks

JANTX Discretes: Have increased up to 30 weeks from Microsemi/MACOM. VPT at 20-24 wks

Conditions remain fluid, however EEI continues to be fully operational through these challenging times to afford the best possible customer service. Please communicate with our Sales Service and Support for any concerns and further developments.

Sincerely,

Ruth M. Jones

Supply Chain Manager
