

## Course Title: IPC-7711/7721 CIS Recertification

IPC's 7711/7721 Training Program provides individuals with a valuable, portable credential that recognizes their understanding of the standard. The certification is required throughout the medical, aerospace and military manufacturing industry as a condition of employment. Students obtaining the certification are in a position to retain their current employment and/or obtain employment in this industry.

Course Duration	2 Days – Classroom Recertification or 8 Hour – Challenge Exam
Course Description	<ul> <li>This 2-day recertification course is a condensed version of the 5-day IPC 7711/7721 initial certification course and is taken to maintain certification status. This course provides a refresher of current and/or new procedures; instructor led hands-on skill testing and online exam.</li> <li>In lieu of classroom recertification, Challenge testing is an option to recertify. Hands-on skill testing and online exams take approximately 8 hours to complete and are proctored by a Certified IPC Master Trainer (MIT) or Certified IPC Trainer (CIT).</li> <li>Upon successfully completion of the recertification class or challenge testing, CIS's are certified for 24 months (2 years).</li> </ul>
Who Should Attend	CISs who will need to recertify in order to keep their IPC-7711/7721 Specialist certificate valid.
Career Potential	The career potential for this position is an assembly level position leading to high level solder technician and repair/rework position.
