

Course Title: IPC-A-610 CIT Certification

The IPC-A-610 Training Program provides individuals with a valuable, portable credential that recognizes their understanding of the Acceptability of Electronic Assemblies. The certification is required throughout the medical, aerospace and military manufacturing industry as a condition of employment. Students obtaining the certification are in a position to retain their current employment and/or obtain employment in this industry.

Course Duration	4-Days / 32 Hours
Course Description	 Upon successful completion of this course, students will be familiar with the IPC-A-610 acceptability criteria for all 3-classes of products and be able to apply this criterion to internal quality functions and are qualified to teach the IPC-A-610 Certified Application Specialist (CIS) training program. The IPC-610 acceptability criteria is not a hands on application based training program, but rather an inspection based lecture training program whereby students learn the acceptance criteria. The course provides an instructional module on classroom management and training techniques as well as IPC reporting requirements that each CIT is required to understand and perform. Upon successfully completion this course, CIT's are certified for 24 months and are qualified to teach the IPC-A-610 CIS (Operator) course.
Who Should Attend	Candidates for this training include in-process quality inspectors, incoming quality inspectors, quality auditors and quality engineers who have a high aptitude for training.
Career Potential	The career potential for this position is an internal trainer to the organization.
