Course Title: IPC-A-610 CIT Recertification

The IPC-A-610 Training Program provides individuals with a valuable, portable credential that recognizes their understanding of the Acceptability of Electronic Assemblies. The certification is required throughout the medical, aerospace and military manufacturing industry as a condition of employment. Students obtaining the certification are in a position to retain their current employment and/or obtain employment in this industry.

Course Duration	*2-Day Classroom Recertification* *or* *8 Hour - Challenge Testing*
Course Description	• This 2-day recertification course is a condensed version of the 4-day IPC-A-610 CIT initial certification course and is taken to maintain certification status. This is a classroom instructor led course with an overview of the 610 document with online exams that must be passed for recertification. • In lieu of classroom recertification, Challenge testing is an option to recertify. Online exams take approximately 8 hours to complete and are proctored by a Certified IPC Master Trainer (MIT). • Upon successfully completion of the recertification class or challenge testing, CIT's are certified for 24 months and are qualified to teach the IPC-A-610 CIS (Operator) course.
Who Should Attend	CITs who will need to recertify in order to keep their certification valid, and be able to train CISs.
Career Potential	The career potential for this position is an internal trainer to the organization.
